SUPER CUB 50/110 '18-, CT125 '20-

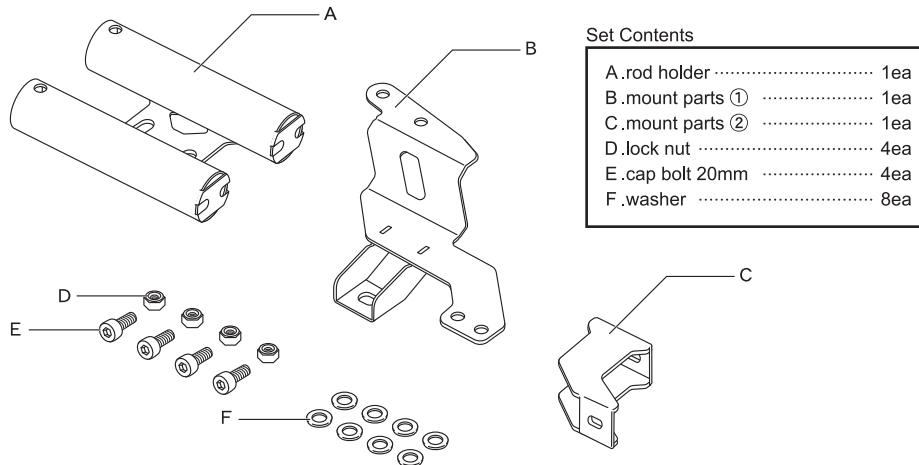

Thank you for purchasing our DRC product.
In order to use this product correctly, please read this manual carefully before use.

1.Important notes

- Special knowledge and skills are required for installation. Careless work may cause an unexpected accident or failure.
- Check regularly for loose bolts.
- *Installation may become loose due to vibration or impact.
- Maximum load on this product is **1.5 kg**. Please do not load luggage exceeding this limit.
- Fishing rod with grip diameter less than 30mm can be stored.
- The passenger foot pegs cannot be used and must be folded while the rod holder is attached.
- It is recommended to fix the fishing rod to rear carrier etc. to avoid the fishing rod from dropping.
- Please make sure that the overall height and length of the bike with the fishing rod stored in the holder do not exceed the vehicle safety standards of the country or region where it is used.
- This product cannot be used with other optional parts if they interfere with this product.
- Please do not modify this product.

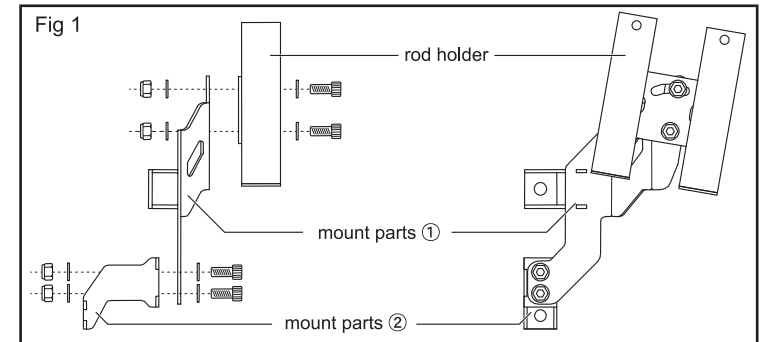

2.Set Contents

The figures on this instruction are for D60-03-001, but the installation method for D60-03-005 is the same.

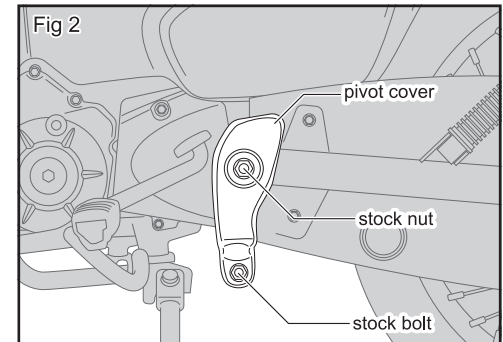

3.Installation

- 1) Assemble the mount parts ①, ②, and the rod holder without fully tightening the bolts according to Fig 1.

- 2) Remove the stock bolt and nut from the left side of the swing arm, and remove the pivot cover (Fig 2).

- 3) Reuse the removed stock bolt and nut to install the fishing rod holder according to Fig 3.
